Projects

Senior Design & Development Project   **Fall 2016 & Spring 2017**
Technology: Java, Java Spring, PHP, Docker
Worked as part of an international team to design, develop, and implement a course assesment tool in PHP, and Java utilizing the Java Spring framework and Docker containers. Secured and configured a virtual machine for our produciton environment, and configured the environment to work with RIT's single sign on solution using SAML.

NodeJs Vending Machine   **Fall 2016 & Spring 2017**
Computer Science House Major Project, Continuing Project
Technology: Javasript, Node.js
Inherited the remains of a project written in Javascript using the NodeJS framework, and refactored parts of the codebase to enable others to readily continue working on the project.

Interests & Activities

RIT Juggling Club *President*
Developed leadership and interpersonnel skills required to manage a team of 20, and run a regional juggling convention.

RIT Computer Science House
An active alumni of a community dedicated to bettering themselves through personal projects. Lend experince and technical help to community members as they work on new and interesting problems.
