Google Domain Administration - 1 year

Programming Languages

Java - 3 years
SQL - 2 years
Python - 1 year
Powershell - 1 year
Javascript - 1 year
PHP - <1 year
Swift - <1 year

Experience

Lower Hudson Regional Information Center   http://www.lhric.org/

Junior Network Specialist Managed Information Technology Department   **May 2017 to Current**

A level 2 engineer working on a centralized team designing, testing, and deploying repeatable processes to help school districts utilize technology. Responsibilities include:

- Upgrading client desktop and server hardware to support growing environments.
- Upgrading server and desktop operating systems to maintain compliance with security regulations.
- Configure the desktop user experience for different departments using group policy.

Systems & Operations Intern Systems & Operations Department   **Jan 2016 to Aug 2016**

A member of a team offering disaster recovery, business continuity, and operational services.

- Provided VSA and file level backups using Commvault.
- Offered content & web filtering to our clients using Lightspeed.
- Distributed and Managed Updates using our downstream on premises WSUS Server.
- Monitored server health using Solarwinds Orion.

Projects

District Migrations - Information Technology   **Feb 2017 - Dec 2017**

Worked to migrate clients from a decentralized support model to a centralized support model through multiple smaller migration projects.

- Upgrading outdated Dell server and desktop hardware to maintain hardware and security compliance with current operating systems specifications.
- Analyzing business needs, and identifying specialized software to tailor fit custom user experiences to each site.
- Migrating users from Novell environments to Windows environments.

Senior Design & Development Project - Programming   **Fall 2016 & Spring 2017**

Technology: Java, Java Spring, PHP, Docker

Worked on an international team to design, develop, and implement a course assessment tool in PHP, and Java utilizing the Java Spring framework and Docker containers. Secured and configured a virtual machine for our production environment, and configured the environment to work with RIT's single sign on solution using SAML.

Intern Project: Desktop Imaging Solution - Information Technology   **Jan 2016 to Aug 2016**

Created secondary sites and distribution points in Microsoft System Center Configuration Manager.
Deployed Windows OS images & Application Packages using Microsoft System Center Configuration Manager.

Education

Rochester Institute of Technology - *Rochester, NY*

Bachelors of Science in Information Technology.
Graduated May 2017

Interests & Activities

RIT Juggling Club President Developed leadership and interpersonnel skills required to manage a team of 20, and run a regional juggling convention.

RIT Computer Science House An alumni of a community dedicated to bettering themselves through personal projects. Lend experince and technical help to community members as they work on new and interesting problems.
